	Columbia University

World Ranking #9

N=300

	University of Michigan-Ann Arbor
	University of North Carolina at Chapel Hill
	King's College London
	Harvard University
	University of California, San Francisco
	University of California, Los Angeles
	University of Washington
	University of Pennsylvania
	University at Buffalo, the State University of New York
	University of Sao Paulo

University at Buffalo programs in dentistry and civil engineering are among the top 10 in the United States, according to the 2021 Global Ranking of Academic Subjects by the Shanghai Ranking Consultancy.

The rankings, regarded as one of the most prestigious and influential global rankings in higher education, place programs offered by UB's School of Dental Medicine at No. 8 in the nation and No. 9 worldwide.

Civil engineering, which is part of the Department of Civil, Structural and Environmental Engineering in the School of Engineering and Applied Sciences, was ranked No. 4 in the nation and No. 17 worldwide.

The Global Ranking of Academic Subjects are largely based on university research outcomes, and institutions are scored on the number of articles published in influential academic journals, the impact and citation of research, the amount of prestigious scientific awards presented to faculty, and the volume of international collaboration on research.

Joseph J. Zambon, dean and SUNY Distinguished Teaching Professor in the School of Dental Medicine, said the ranking shows the dedication and innovation of individuals within the dental school.

"I am extremely gratified that the remarkable accomplishments of our faculty, students and staff are recognized in this latest Academic Ranking of World Universities. And we're very happy that our ranking supports the goal of UB President Satish Tripathi and Provost A. Scott Weber for the University at Buffalo to become one of the top 25 public research universities in the country," he said.

UB's Foster Hall Celebrates 100 years!

SDM's 2021 Department of Oral Biology, School of Dental Medicine, Foster Hall, South Campus

Foster Hall was the first building built specifically for the University on the new campus recently purchased at Bailey Avenue and Main Street.

At the dedication ceremony, Chancellor-Elect Samuel P. Capen remarked that: "Mr. Foster and his family have done much more than to give the University adequate laboratories and class rooms for chemistry and pharmacy... They have set the tone and the standard for the other buildings of the new University of Buffalo which are to be erected on this site."

In 1922 the new Arts and Sciences College moved into the Foster from its previous home, Townsend Hall on Niagara Square.

Today Foster is home to classroom and research space for a portion of UB's nationally recognized School of Dental Medicine.

Namesake:

Orrin Elliott Foster (1840-1928) was a manufacturer of medicines and a member of the University Council. Foster Hall was a gift of Foster and the members of his family for a Hall of Chemistry.
