

Longevity - Orascoptic has been crafting loupes & headlights with meticulous precision in Madison, Wisconsin for over 35 years.

Customization - Each pair of loupes is personalized to the clinician's facial geometry & made with performance and comfort in mind.

Clarity - Orascoptic 2.5x loupes are the clearest in the industry.

Innovation is at the core of what we do. We're proud to advance the industry with innovations such as the EyeZoom™ and TruColor™.

A recent third-party study concluded Orascoptic 2.5x loupes are the clearest in the industry.

LAB-TESTED RESOLUTION + BRIGHTNESS = CLARITY

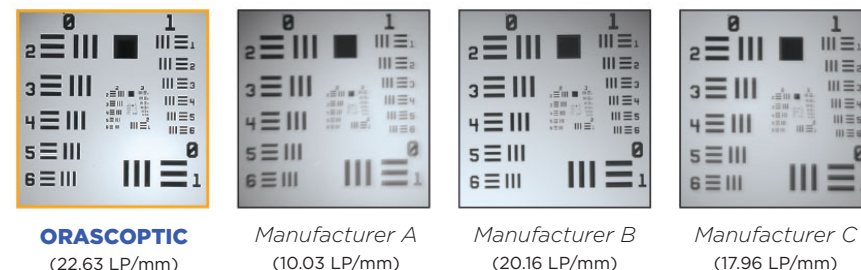

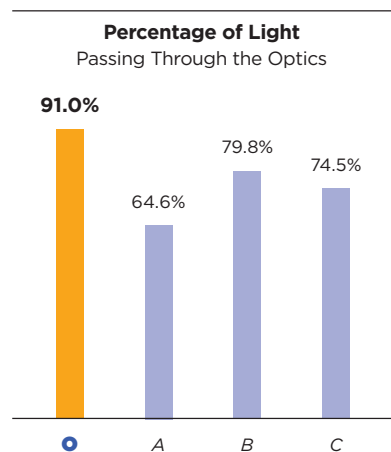

The difference is striking. In a series of third-party lab tests, Orascoptic's 2.5x loupes consistently outperformed the competition. **Most notably, our scores were outstanding in the areas that contribute most to image clarity.**

▶ THE LIGHT TRANSMISSION TEST

For the light transmission test, Orascoptic's loupes measured:

- **40% better** than *Manufacturer A*
- **14% better** than *Manufacturer B*
- **20% better** than *Manufacturer C*

The greater the light transmission, the brighter the image which together enhances image clarity.

▶ THE RESOLUTION TEST

For the resolution test, Orascoptic's loupes measured:

- **125% better** than *A*
- **12% better** than *B*
- **26% better** than *C*

Your Orascoptic representative: **Gregg Brown 412-302-6739 / gregg.brown@orascoptic.com**
